- info@tecnocompositi.com

Tecnocompositi was established in 1984 near Salerno and is currently considered among the leading Italian companies in the field of fiberglass manufacturing (particularly for trains, buses and trams), isothermal insulation for commercial vehicles, and installation and maintenance of refrigerant units and isothermal swap-bodies.

The company operates in the field of applications of advanced systems, using composite materials with polymer matrix (glass fiber, carbon fibers impregnated with polyester resin, epoxy and phenolic).

Such activity is actualized in the realization of a series of finished products carried out according to both customer's plan and TECNOCOMPOSITI's original project in automotive sector in general, through the realization of components for special vehicles for police, street food, ambulances, campers, mobile medical laboratories, minibuses, public sector (rail industry, buses and trams), school bus, ecological services, mobile offices.

Our distinctive characteristics:

- *Made in Italy quality*
- *High-tech*
- *Attention to details*
- *Craftsmanship*
- *Innovative design*
- *Custom solutions*
- *Competence and professionalism*
